DELIVERY GROUPS

In the current profile price list, all aluplast products are assigned to the delivery groups / availability times / prices listed below.

Delivery group	Delivery time
Standard surfaces (ST)	see current aluplast price list
Extended Standard surfaces (ES)	see current aluplast price list
Special surfaces (SO)	see current aluplast price list plus € 60 set-up costs not applicable if purchased on pallets
Price surcharges	10% on woodec and aludec surfaces

Please note:

Despite the utmost care in production, there may be slight colour deviations in the laminates. Any deviations in colour and surface structure of the samples shown compared to laminated window profiles are due to the printing process. The RAL colours specified for wood decors are a non-binding recommendation from aluplast. Availability of additional profiles in decor according to current aluplast price list or overview plan.

The grouping (ST, ES and SO) of the lamination of the system-specific additional profiles can be found in the main systems on the following pages. Cross-system additional profiles and laminated glazing beads are assigned to the best possible group. This means that if the lamination in your system is not a standard (ST), but in one of the other main profile systems, the cross-system additional profiles and laminated glazing beads are also treated as standard (ST) and no additional set-up costs are incurred.

aluplast® – Specialist for window and door systems

aluplast GmbH is one of the leading system providers of PVC windows, main entrance doors, roller shutters and controlled domestic ventilation systems. The family-owned company headquartered in Karlsruhe was founded in 1982 by Manfred J. Seitz. Today, aluplast has 10 production sites worldwide and customers in more than 80 countries. With its wide product portfolio, the company offers almost any possible window construction and variation. Its success is based above all on the company's market proximity that always results in pioneering innovations.
